

NEWS OF THE MINING WORLD

PROGRESS OF GOLD MINING IN NOVA SCOTIA IN THIRTY YEARS.

Encouraging reports from all the Nova Scotia mines are being received. The big tunnel at Pines Altos is now being driven at the rate of a foot a day. The new mine at Pines Altos is now being driven at the rate of a foot a day. The new mine at Pines Altos is now being driven at the rate of a foot a day.

In 1801 gold was first discovered in Nova Scotia. It was found at Tangle, near Halifax. The man working the first mine was very primitive. The gold was worked in huge, rough cradles. No machinery of any importance was introduced for some years. Two men worked a small lead called the knife lead, with only a hammer and pick for some months, and lived in a cabin on the mine.

Notwithstanding the fact that the first mines were worked under difficulties, such as inexperienced hands, lack of capital and machinery, the latter causing in some cases power engine, during the years from 1804 to 1884 the average yearly return per man employed was \$900. The absence of proper machinery prevented the mines from being worked to any depth, and the consequence was that most of the mines were merely skimmed and left. Many of the old mines were abandoned by more enterprising men and capitalists, who prospected, bought, sold, made, and lost fortunes, and improved mining by introducing better machinery.

During the first few years of gold-mining excitement in Nova Scotia, American and European capitalists were ready to invest any amount of cash in prospecting and buying. Mines were sold that existed only on paper and in imagination. Barren quartz and unproductive mines were "loaded" by artificial means, claims staked off and quickly sold to eager capitalists. Sometimes men of pure gold went to the mines, but they were not to stay, and afterward dug out as specimens, the intended victims quickly taking the bait.

The end of this boom came when an abatement in mining for some time, but it made fortunes for some and gave experience to others. The time now is a time of steady mining. Before a company invests any amount of money it must see some chance for a return. The mines are taken up in areas of 150 feet by 250 feet. An annual rental of 50 cents is charged by the Government, but if a certain amount of work specified by law is performed on each claim, the rental money is refunded.

There are at present about thirty-four mines in operation. They are mostly in Halifax and Gushborough counties. Among the principal mines are the Salmon River, Waverly, Killam, Central, Dawson, and the Silver Stream. The Silver Stream mine is the largest and most productive. It is owned by the Silver Stream Mining Company, which has a capital of \$1,000,000.

In most of the mines, the work is done in shafts which reach down to the level of the water, and the water is then pumped out. The shafts are usually 400 feet deep and made of iron. The water is pumped out by a steam engine, which is usually 400 feet deep and made of iron.

There is no doubt that the mines, if properly worked, would pay to a much greater depth, but this is a feature of economy is yet to be developed in Nova Scotia gold mining.

IDAHO CITY, Sept. 23.—Two car loads of machinery have just arrived at Conness for the Idaho City mine. The machinery is being used for developing the rich placer mines on the Red River meadows. There is a large amount of money being invested in the mine, and the prospectors expect to realize large returns from the mine.

Last year George Burdett discovered a ledge of the Red River meadows and Boise City. He did not get the mine, but he did get the machinery. A few days ago he procured some quartz from the surface of the vein for testing. On breaking the rock he found a large quantity of silver. The native metal glittering all through. He will soon commence development and construction of the mine.

The Mountain View mine has been sold to the Idaho City Mining Company. The mine is located on the Red River meadows, and is a very rich mine. The company has a capital of \$1,000,000, and is expected to realize large returns from the mine.

The Idaho City Mining Company has been operating the mine for some time. The mine is a very rich mine, and is expected to realize large returns from the mine. The company has a capital of \$1,000,000, and is expected to realize large returns from the mine.

THREE DAYS WITHOUT FOOD.

THE TERRIBLE EXPERIENCE OF JACOB ERICKSON.

He started out for a walk on Orange Street, New York, on Saturday, Oct. 1, at 10 o'clock. He was a man of about 40 years of age, and was dressed in a suit and tie. He was walking towards the city, and was looking at the buildings on either side of the street.

In one corner of a field on Valley Way, in the Orange Mountains, is a small shallow indentation matted with long grass and just big enough for a man to lie down in. Overhanging sumachs shade it and a luxuriant growth of purple asters and golden rod forms a brilliant curtain shutting it off from the view of people passing by on the Valley Way road, only fifteen feet distant. In this hollow, almost within arm's reach of the hundreds of wagons and carriages that go along the road every day, and in easy halting distance of two houses, a man lay from Saturday, Sept. 24, until the following Tuesday, without food, and with only a few drops of water.

Before he had gone far he began to feel pain in his limbs, which finally became so bad that he could not move. He was lying on his back, and was looking at the sky. He was feeling very tired, and was looking at the sky. He was feeling very tired, and was looking at the sky.

He was feeling very tired, and was looking at the sky. He was feeling very tired, and was looking at the sky. He was feeling very tired, and was looking at the sky. He was feeling very tired, and was looking at the sky.

IN THE REAL ESTATE FIELD.

A better feeling is noticeable in certain centers. The apathy incident to the summer season and the indifference invariably noticed in Presidential political times, not to mention other influences more or less unfavorable to a rapid market, are still abroad and remarked.

There is, however, some change for the better, and the almost total lack of investment and speculative interest. No boom is expected, but as the fall season progresses a wider interest accompanied by freer transactions will doubtless be recorded.

Brokers' sales include: Charles Mackay reports having sold for the estate of M. A. O'Brien the four-story brown stone, dwelling, 807 100 feet in size, on lot 125 feet deep, No. 587 Fifth avenue, for \$240,000. It is a quartered lot. The property was purchased for investment.

COURAGE UPON MISSIONARIES.

They Are Beaten in Central China Because of a Drought.

SAN FRANCISCO, Oct. 2.—A letter dated Aug. 15, written by a missionary at Yang-tze-ting, fifty-five miles from Chentu, in the province of Szechuan, China, gives this account of an assault upon missionaries in that province, in an attempt to leave a wife and two children, and Mr. and Mrs. Turner, with their young child, spent yesterday with us, and the Doctor leaves for the village to-day.

Mr. and Mrs. Turner have been subjected to gross ill treatment at Sungpan, which they had gone to meet Dr. Turner, as Mrs. Turner was ill. It was while they were waiting at Sungpan that the natives, who were suffering from want of rain, concluded that the foreign missionaries were hoarding grain, and they had used their arms to prevent rain.

The natives were lashed into fury at this, and attacked the missionaries. Mr. Turner was seized, his arms and legs tied, he was kicked and struck over the head, and a mob seized his wife and children. A military band, apparently to gain time, suggested the missionaries to leave, but they refused to leave. The mob proceeded further. This being accepted, they were taken to the Yamen and ordered to be beaten in their place. The mob was satisfied, and the missionaries left Sungpan for this place.

The cholera is still bad at Chentu, and many unfortunates were lying outside the city.

Visitors to the Italian Cruiser.

Although the weather yesterday was slightly cool and there was a stiff breeze on the river, thousands greeted the Italian cruiser, Giovanni Bausan. Between 1 and 6 o'clock, the time for visitors, 3,000 persons went aboard. There were crowds on the pier near West Twenty-third street, and the Italian cruiser, Giovanni Bausan, was busy carrying passengers to the ship, and at least fifty small boats piled up at the shore.
